Statement of Environmental Commitment

The guiding principles of the Hydrodec business include sustainable use of natural resources and reduction in the environmental impact of all industry. Hydrodec recognises that its commitment to a high standard of environmental excellence commences within our own operations and the communities where we operate. We will adopt measures to ensure that our business activities are carried out responsibly. We are committed to implementing this Environment Policy and will manage our business consistent with its intent.

In support of this Statement of Environmental Commitment, Hydrodec will, wherever we operate:

- > **Ensure** that our technologies, systems and products are engineered to provide ongoing improvement in sustainable resource use and lower the environmental impact of the customers we serve.
- > **Comply** with the requirements of all relevant legislation, licence conditions and industry standards.
- > **Identify** environmental issues relevant to our business.
- > **Provide** resources and training to manage and systematically reduce emissions to air, water and ground.
- > **Develop and implement** Environmental Management Systems, including procedures that are integrated with our business activities.
- > **Ensure** that all staff and contractors are aware of their environmental responsibilities and are accountable for their actions.
- > **Maintain** awareness and understanding of the environmental impacts of our processes and products through research and development and consultation.
- > **Seek** continual improvement in our environmental management through regular audits and monitoring to assess performance against our objectives and targets.
- > **Promote** responsible use of Hydrodec products to minimise pollution and risks.
- > **Demonstrate** openness in dealing with communities where we operate.

We believe that every one of us is responsible for minimizing harm to the environment
